

Water cycle measurement systems

WebFluid data hosting service

WebFluid

Maximum security for your remote field projects

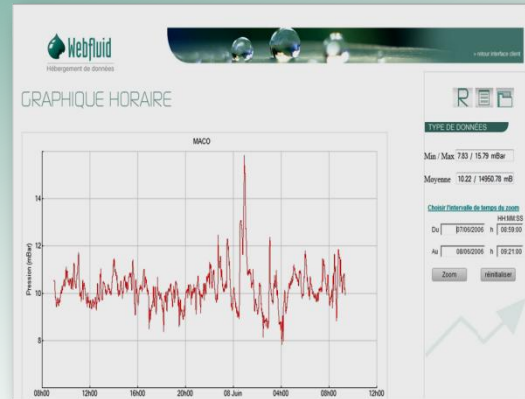

Hydreka makes data access easy for operators and project managers with Webfluid.

Just an Internet access and browser provide:
Data Collection, Centralisation, Hosting and Display

24 hours a day, 7 days a week

Operational advantages:

- Storage and display of measured-value tables and/or data graphs (history available)
- Data tracking in real time and alarm management
- Sending out of data and alarms
- Data processing (in WinFluid and/or customer format as an option)
- Hydreka installation assistance + Hotline

Cost effectiveness:

- Increased responsiveness and optimised working in the field
- No need for specific computer hardware/software
- No maintenance expenses
- Service without commitment
- Turnkey service: provision of SIM cards, subscription, instrument configuration and maintenance (in the case of rental)
- Cost of service varies according storage volume required (in the case of purchase)

Data security:

- High security server within a Net center
- User rights managed by a dedicated system administrator
- Specific UserID and password for each user

Service available for purchase or rental. Contact us for further details.
