

# Integrated measuring systems for the whole water cycle

## Metal detector **IMP Box**

Rugged industrial metal detector

## Imp Box Locator

Although originally designed to accurately locate valve boxes and manhole covers, the **Imp Box Locator** can also be used as a general purpose metal detector. **Imp Box Locator** is both deceptively simple to use and very rugged making it a favourite choice in the market.

Detecting metal objects down to a maximum of 1m (39.4"), **Imp Box Locator** has a number of key features over other industrial metal detectors. These include:

- A strong focussed search field ensures the accurate location of objects close to metal fencing and vehicles.
- Ignores any ghost signals from cigarette packets, drinks cans and other metallic waste materials - often picked up by other detectors on the market.
- Manufactured from a single moulded design, in high impact ABS plastic, the **Imp Box Locator** stands up to the tough environment.
- Balanced, lightweight unit with a single control button for ease of use
- Audio signal with headphone socket and an ultra-bright LED visual indicator identify when metal has been detected.

### At a glance :

- *This rugged industrial metal detector is designed to locate valve boxes & manhole covers accurately & quickly.*
- *Focused search coil allows for accurate location of objects even when they are close to metal objects (cars, metal fences etc).*
- *Ignores drink cans, cigarette packets & other metallic waste material.*

DIMENSIONS		
	Metric	Imperial
Overall Length	96cm	38"
Search Head Diameter	21cm	8"
Weight	1.1kg	2.5lb
Power Supply	4 x 1.5V AA Cells (Alkaline) or 4 x 1.5V NiMH Rechargeable Cells	

APPROXIMATE DETECTION RANGES		
Typical Object Type	Metric	Imperial
Stop Top Box	50cm	19"
Fire Hydrant Cover	87cm	34"
Inspection Cover	95cm	37"
